

Fastback Model 8X

The Fastback® Model 8x is the most compact and affordable binding machine that Powis Parker offers. In spite of its size, it is also a powerful machine that can produce bound volumes three times faster than traditional punch-and-bind systems. With its ability to create bound documents of any size from 10 to 250 sheets, this machine is perfect for the office that needs a versatile binding machine for short-run and occasional jobs.

The Fastback® Model 8x will work in concert with the Foilfast® printer, creating a powerful combination of features and capabilities at a reasonable price. Its desktop footprint (10" x 17.5") is small enough to fit the most cramped conditions. It works with the Powis Parker Lx-Strip™ binding strips, and the Halfback™ covers, as well as most other Powis Parker covers, including the Bindercover™, which are perfect for creating the ultimate in professional-looking reports.

The Fastback® binding is both durable and attractive. Pages in a Fastback® document can withstand more than 50 pounds of pull. The rugged thermoplastic adhesive will not become brittle with age. Even with daily use, a Fastback® bound document will stay bound for years to come. And yet, you can remove and replace pages in a book long after it has been bound.

Fastback Model 8X Features:

- Affordable yet powerful
- Small footprint (10" x 17.5")
- Binds 10 to 250 sheets in 40 seconds
- Uses Lx-Strip™ binderstrips
- Uses Comp Cover™, Halfback™, clear, and Bindercover™
